

VITAspa
Vitality for Life

www.vitaspa.co.uk

Creating a luxury hot tub takes a lot of experience and knowledge. You can be assured that buying a Vita Spa is a sound investment into your family's future and it will bring many happy years of enjoyment.

At Vita Spa we stand by our quality and reliability, to ensure you continue to enjoy your spa for years to come.

VITAspa

History of Vita Spa

Vita Spa History

Way back in the 1970s Vita Spa were launched in the USA at the very start of the hot tub industry as we know it. Now produced in Arizona by the MAAX Spas Industries Corporation by a team of people that are proud of their work and live by their reputation. Many employees at MAAX Spas have been there for over 25 years so they know a thing or two about building spas.

Building a great spa takes a lot of experience and knowledge. To be able to offer a lifetime warranty on our steel frames and patented insulation is no easy task and took many years to perfect these extremely important features built into our 500 and 700 series range.

You can be assured that buying a Vita Spa is a sound investment into your family's future and it will bring many happy years of enjoyment. We don't cut corners like other brands to offer cheap spas that are built on a budget. At Vita Spa we stand by our quality and reliability. You can truly relax when buying a spa from us.

World's Greatest
Featured on The World's Greatest TV show, explaining why our spas are one of the world's best.

Environmentally Friendly

Electricity costs have risen sharply in the last few years

Running costs have become an important issue when purchasing a spa. Most spas produced over 10 years ago were not manufactured with the same attention to this issue so many spa owners with an older model may find an upgrade is a worthwhile option to achieve lower running costs.

All our spas are manufactured using the very latest eco-friendly systems using recycled materials wherever possible to provide extremely low running costs.

This is achieved in a variety of ways. Firstly, we provide a complete envelope of insulation to prevent heat loss via the spa itself. Secondly, we use reflective technology to again push the heat back into the spa water. Thirdly, we recycle the wasted heat created by the spa pumps and again push this heat back into the spa.

Insulation System

The Vital Energy Insulation System features eco-friendly insulation made from recycled natural fibre. This insulation contains no chemical irritants and is treated with a borate-based solution to prevent mould/mildew growth and pest infestation.

Northern Exposure®

Northern Exposure® is the ultimate hot tub insulation system. This unique thermal barrier technology recycles the free heat energy for more efficient heating and lower energy costs. All four sides of the spa, plus the floor and cover are lined with reflective copper material.

Health Benefits

Stress Relief

Stress results in muscle tension, headaches, fatigue and soreness. Regular hot tub use, through a combination of buoyancy, heat and massage relieves tension and stress. Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing. Additionally, hot tub jets provide therapeutic massage, stimulating the release of endorphins; the body's natural painkiller.

Lowers Blood Pressure

A recent study for the Mayo Clinic recommended that relaxing in a hot tub can be beneficial for heart disease patients. The study showed that relaxing in a hot tub is less stressful on the heart and more beneficial than working out on an exercise bike! The study also demonstrated that soaking in the hot tub for as little as 15 minutes will lower blood pressure.

Promotes Weight Loss

Regular hot tub use has also been linked to weight loss. In clinical studies, patients who used hot tubs lost an average of 3.5 pounds without any new diet or physical exercise. The hot water massage simulated the effects of exercise on the muscles, gradually helping them lose weight.

Sleep More Soundly

No more counting sheep! According to the National Sleep Foundation, 30 million Britons suffer from mild to chronic insomnia and other sleep disorders. A study in the journal 'Sleep' showed that soaking in a hot tub prior to bedtime will not only help you fall asleep, but will provide a deeper, more relaxing sleep as the body cools.

Lower Diabetic Blood Sugar Levels

The New England Journal of Medicine found that bathing in a hot bath simulates the beneficial effects of a hot tub. Studies revealed that patients with type 2 diabetes, who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

Minimise the Pain of Arthritis

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints. A relaxing soak in a hot tub can help with muscle relaxation, decreased pain, joint stiffness and greater ease when exercising and daily activities.

Massage Styles

Vita Spa jets were designed to heal

Think of them as your own personal masseuse waiting to work those aches and pains away. Our jets offer a variety of effects and are completely adjustable to personalize your massage. Once you experience their natural healing power, you'll be left wondering how you ever lived without them.

A Vita Spa is designed to deliver a complete back massage like you would receive at a massage clinic. There are five techniques that are commonly performed to improve circulation, relieve tension, and relax. Your Vita Spa utilizes different jets and configurations to deliver these massage treatments.

Effleurage

This is a sliding or gliding massage performed along the back in a continuous motion. Effleurage is both relaxing and healing. This treatment uses powerful streams of water directed upwards along the back towards vital organs. Combining this with direct pressure jets creates an incredible, healing massage.

Petrissage

This "kneading" motion massage is commonly used for larger muscle groups. Rotating jets in Vita Spa create this kneading motion, relieving tension and pain locked deep in the muscles.

Tapotement

This technique is a rhythmic tapping using the edges of the hands or lightly with the palms. A tapotement massage promotes blood flow and circulation to help the body carry away toxins and acids that can build up, causing pain and stiffness.

Circular Friction

This is also called cross-fiber massage. A circular motion across the muscle fibers work to unlock stiff and tired muscles, relieving stress and increase mobility.

Shiatsu

Finger pressure, or Shiatsu massage, focuses on the acupressure points of the body for relief of aches and pains. The small, finger-sized jets are placed along these pressure points for a targeted massage.

Reflexology

Reflexology targets the nerve endings in the hands and feet that are connected to the entire body. Effectively massaging these areas is a key to complete relaxation.

Vita Spa Features

Made in the USA

The hot tubs we see today were first created in the United States of America back in the 60s and that experience through the decades has enabled the US manufacturers to build the world's very best spas. Quality and innovation through past experiences.

Steel substructure

The steel structure design in Vita Spa 700 and 500 series hot tubs allows for complete service of the entire structure and all mechanical parts. The spa can be serviced and brought back to factory specifications right in your backyard. We call this feature "Appliance Grade."

The Vita Spa 700 and 500 series hot tubs have a steel frame which provides greater structural integrity than wood, as well as superior corrosion protection for a much longer life. It will not expand or contract with moisture. The inorganic properties will never rot, warp, split or crack and eliminate worries of animal infestation or termite damage

Lifetime steel structure warranty

Our steel structure carries a lifetime warranty. This means for the lifetime of your ownership you can feel secure knowing any component of the substructural frame will be replaced or fixed to factory specifications.

- 40% lighter, yet 250% stronger than traditional wood frames
- Weatherproof
- Corrosion-free

Northern Exposure® insulation

Is a unique thermal barrier technology that recycles the free heat energy for more efficient heating. All four sides of the spa, plus the floor and cover, are lined with copper material to reflect radiant heat energy generated from the pumps back into the spa.

Weathershield cover

Weathershield covers are lined with our copper insulation sheet to improve heat retention. Double stitched seams for durability allow the cover to hold over 400 pounds.

The outer shell is extremely weather resistant to fading while weighing about 25% less than other covers in the industry.

Vita Spa Features

Lifetime Insulation Warranty

The insulation system in your new Vita Spa hot tub is warranted to maintain the same insulation value as it had at the time it was manufactured. As you enjoy your spa over the years, you'll feel secure knowing it can be maintained at the same high level of efficiency as the day it was made.

Fully electronic 56 frame pump

Vita Spa hot tubs utilize Direct Drive 56 frame pumps in all models. These are larger and more powerful than the 48 frame motors found in most spas. This eliminates mechanical switches, allowing the pumps to run longer and more energy efficient.

Know your spa's health at a glance

The status indicator light is a standard feature on all 700 series hot tubs, allowing you to check the status of your hot tub without opening the cover or App. The colour changes from blue to red or flashes blue or red with corresponding error codes.

The Vita Spa 700/500 series filtration system

Our dual filtration system ensures that the maximum amount of water passes through the filters before it re-enters the spa. Filtration is driven by the powerful jet pumps, which rapidly circulate large amounts of water.

ABS sealed base

The ABS Sealed Base is made of one-piece construction and provides a rugged foundation that seals the bottom of the spa, locking in heat and sealing out moisture.

CleanZone® Ultra

The use of the CleanZone® Ultra UVC light is the same technology utilized in many communities around the world to purify drinking water. This technology is combined with an Ozone System that is used to oxidize and clean your spa water.

This ultimate water purification system will automatically maintain healthy, crystal-clear water while reducing chemical maintenance. CleanZone® Ultra kills 99.9% of micro-organisms, bacteria, viruses, and parasites, making this the perfect sanitization system for your spa.

Colour Options

Acrylic Colours

Vita Spa hot tubs are finished in an attractive interior made from continuous cast acrylic. This is superior to ethylene "soft plastic" surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescent, the extremely rugged and durable finish offers beauty and peace of mind.

Silver Marble

Glacier Mountain

Smokey Mountain

Midnight Canyon

Storm Clouds

Tuscan Sun

Excel-X™ Cabinets

Made from a high impact composite, Excel-X looks and feels like real natural wood. Excel-X is ecologically friendly, doesn't weather or stain, and is virtually maintenance free.

AQUAGLO®

Colour Therapy

Lights in your hot tub direct your mood based on the colour, and your Vita Spa has every option. While warm colours can stimulate increased circulation, appetite, and energy, cool colours are known to reduce stress and anxiety while promoting relaxation and the feeling of clarity.

Aurora Cascades

A true illuminated laminar stream of water providing a soothing visual and sound effect.

Illuminated Pillows

Illuminated Contoured Pillow cradles your head for complete comfort.

Illuminated Cup Holders

A comforting dip with your favourite beverage is the perfect combination. Vita Spa's Illuminated beverage holders add to the soothing light show.

Illuminated Controls

Diverter valves are illuminated for easy use at night and distinction from the non-lit air control valves along the rail.

Rendezvous

Come together in the Rendezvous and enjoy the best in relaxation. The collection of jets featured in this spa work together to bring you full-body recovery.

- 4 Aurora Cascade Water Features
- 5 Illuminated Cup Holders
- 17 Underwater LED Lights
- Smart Touch II Control Panel
- Integrated Bluetooth Music System with Subwoofer
- Large Dual Cartridge Filtration
- Latest Technology M7 Heating
- Northern Exposure® Insulation System

Layout: The large all seater layout of the Rendezvous gives you a variety of relaxation zones that deliver incredible hydrotherapy. Three large corner seats give an assortment of massage while the two cool down seats finish the layout.

Another special feature of the Rendezvous is the extra large footwell that accommodates 3 Volcano Jets, allowing all users the opportunity of that special foot massage.

Mystique

Our fitness spa is designed to help you with active recovery and staying in shape so your body can feel its best no matter what. With easy-to-use exercise equipment, it's no hassle to take the time you need to get in a good workout followed by incredible relaxation in one of this spa's many seat options.

- 4 Aurora Cascade Water Features
- 6 Illuminated Cup Holders
- 17 Underwater LED Lights
- Smart Touch II Control Panel
- Integrated Bluetooth Music System with Subwoofer
- Large Dual Cartridge Filtration
- Latest Technology M7 Heating
- Northern Exposure® Insulation System

Layout: The spacious layout of the Mystique gives you a variety of relaxation zones that deliver incredible hydrotherapy. Two large corner seats are fitted with our Champagne Air® rings and vertical back massage.

A further large corner seat and two bench seats give an assortment of massages while safety entry steps finish the layout, and you won't need to play footsie with anyone due to the Mystique's extra large footwell.

3M
Thinsulate™
INSULATION

700 & 500 Series
Northern Exposure®

Northern Exposure® is a unique thermal barrier technology that recycles the free heat energy for more efficient heating. All four sides of the spa, plus the floor and cover are lined with copper material to reflect radiant heat energy generated from the pumps back into the spa. Heat is then absorbed by the plumbing, helping to maintain water temperature. Finally, the entire hot tub is insulated with 3M Thinsulate™, the same incredible material utilized in winter clothing. This three-layer, patented system ensures energy created by the spa stays in the spa.

Trio

The Trio is a lovely styled rectangular three person hot tub, with 20 Halo Pro-Loc Jets powered by a 3hp Twin Speed Pump.

Enjoy a simple massage and relax in a comforting serenity that dissolves the world around you.

- 2 Illuminated Cup Holders
- 8 Underwater LED Lights
- Smart Touch II Control Panel
- Integrated Bluetooth Music System with Subwoofer
- Large Dual Cartridge Filtration
- Latest Technology M7 Heating
- Northern Exposure® Insulation System

Layout: A spacious 3 person hot tub the Trio gives you one full length Vita Lounge with 12 jets positioned from head to toe and a large slightly reclined seat with armrests offering hand and wrist massage.

Both areas give you a comfortable headrest, so sit back, relax and enjoy this plug and play hot tub.

Longevity and trust are very important in customers' thoughts when considering a hot tub purchase, and rest assured we offer both.

Vita Spa are proudly made in the U.S.A. by MAAX Corp, a company who have been manufacturing spas since 1977 and are one of the largest manufacturers in the world today. Vita Spa have been imported into the UK since 2003 and is now sold through a nationwide dealership network.

Having a dealership network provides local manufacturer trained engineers for delivery, servicing and after sales, which means we achieve a higher standard of customer care, something you can't guarantee from an internet purchase.

The benefit of local expertise is paramount in reassuring customers they will receive a fantastic service from start to finish. We build relationships with them to ensure a great experience enjoying their hot tub for years to come, again something you can't guarantee from an internet purchase.

To find your local authorised dealer visit www.vitaspa.co.uk
